- Audits and Assessments
- Alarm Monitoring, SOC Operations
- Reporting and Continuous Improvements

Security Operations

- Identity Governance & Administration
- Access Management for Web & Mobile
- Directory Services
- Privileged Access Management
- Mobile Security
- Enterprise Single Sign-On
- IAM Architecture Design
- Cloud Single Sign-On
- Technology and Product Selection

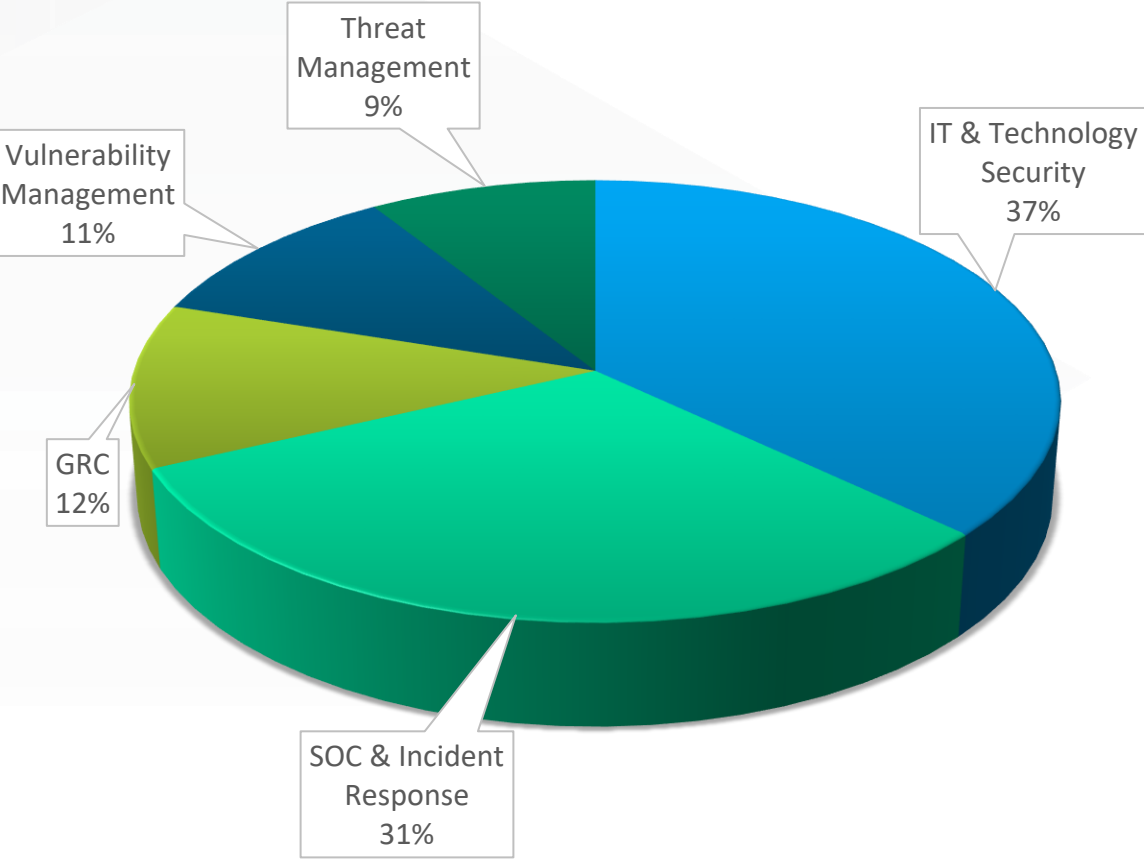

Identity & Access Management

Our Approach to Security

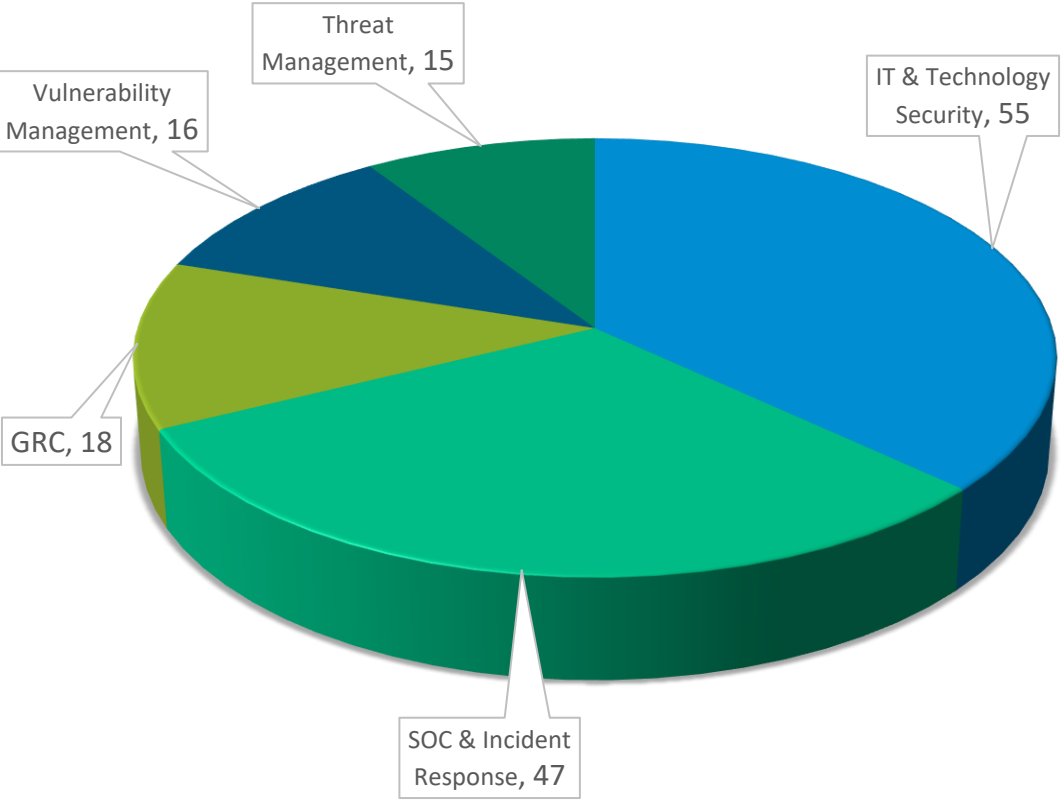

Capability Matrix – Technologies & People

Information Security Services

People Capability

Success Stories- Global Engineering Services Company

Client

Client is a Leading Engineering Services company operating out of 09 Countries and employs 8500 highly skilled workers across globe. The Company specialises in Aero engine, Aero Structure, Oil & Gas, Automobile & Embedded Engineering services for Global Major's like GE, Airbus, Rolls-Royce, Halliburton, Honeywell. Company Was founded in 1997 and has a revenue of 350 Million US\$.

Business Challenge

- Out-dated security infrastructure meant an inability to cope with new and evolving security threats.
- Needed better visibility into their devices to ensure overall security posture and compliance
- Enterprise Security Solutions for Vulnerability Management & Data Protection
- Limited budget for security infrastructure replacement to comply with Compliance Standards

Skillmine Solution

- Information Security Consulting through Resource Augmentation
- Design & Deployment of Security infrastructure monitoring and response Solution
- Data Classification , Data flow Analysis and deployment of DLP Solution
- Recurring Vulnerability, Threat Assessment & Remediation

Benefits

- Adherence to the required security posture standard like ISO27001, HITECH, HIPPA, AS9001
- Skillmine's OEM/Vendor relationship enabled us to provide leading technology at flexible pricing and commercial terms, with priority vendor support and transition services.
- better visibility into their devices to ensure overall security posture and compliance through implementation of Data Protection Solutions

Success Stories- Leading Global Electronics Product Company

Client

Client is a Fortune 500 Global Electronics Products , Media & Entertainment conglomerate operating out of more than 130 Countries and employs 130,000 workers across globe. Company Was founded in 1946 and has a revenue of 68 Billion US\$. The Company Specialises manufacture of Televisions, Camera's , Gaming Consoles, Professional Media Production Equipment's.

Business Challenge

- Lack of Skillset & Specialization to manage Internal Vulnerability Management & Threat Management Solutions
- Security Incident Management & Response
- Management & Enhancement of Enterprise Data Protection Solutions
- Had difficulty managing operational lifecycle of existing security environment

Skillmine Solution

- Information Security Consulting through Resource Augmentation
- Management, Support & Enhancement of Data Protection Solutions
- Security Incident Management & Response Consulting through on Site Incident Response Leads.
- Skilled Resources at Reduced Cost

Benefits

- Measurement of risk profile on an ongoing basis against best practice and desired state
- Lowered its TCO for security infrastructure operation, maintenance and incident response
- Reduced management and support resources
- Skillmine enabled the client to focus its resources on more strategic and tactical business requirements

Success Stories- Indian E-Retail Giant

Client

Client is number One E-Retail organisation of India with a overall turnover of 1 Billion US\$. Their E-Commerce Site generates highest traffic in India. The Company was founded in 2007. Headquartered in Bangalore , The Company Employs 33,000 Worker's and their Year on Year Growth has been over 200 %

Business Challenge

- Due to exorbitant growth of the organization, client was not able to formalize a information security practice and deploy security solutions in the enterprise
- Lack of Information Security Processes & Policies
- No Proper Enterprise Security Solutions for Threat Management & Data Protection
- Low Level of Compliance Adherence

Skillmine Solution

- Gap analysis (with best practice) on current security infrastructure
- Information Security Consulting through Resource Augmentation
- Formulation of Information Security Policies , Processes for the organization
- Re Architecting of Clients Threat Management & VA Security Solution and deploying the same .

Benefits

- Adherence to the required security posture standard and Improved ability to report accurately on security posture to internal and external audit requirements
- Processes and systems ensure proactive and effective management of security infrastructure
- Scalable and stable security environment as well as enhanced management functionality.
