

Amazing Possibilities...

A Fresh approach to
IT Technology Solutions & Service Delivery

Application Code Review

Uncover Hidden Gaps & Vulnerabilities

Our Approach: Skillmine uses a hybrid approach for source code reviews. We conduct code scanning with applicable tools, performs static analysis and injects custom scripts.

Methodology

Through Analysis

- Evaluate the entire code layout such as entry points for different inputs, internal interfaces and integrations, data handling and validation logic, and the use of external API's and frameworks

- VAPT and any other specific Compliance Needs

Potential Bugs

- Identify Gaps and Uncover vulnerabilities with automated code scans & static reviews. Detect weak algorithms, identify design flaws, find insecure configurations and spot poor coding practices

- Produce code review reports that include an executive summary along with listing of strengths & weaknesses.

Summary Report

- Provides findings that include high level recommendations for solutions and fixes

- Code level suggestions & fixes that include more exhaustive checks to find all instances of gaps to fix the same along with common vulnerabilities.

Remediation

- Satisfy industry regulations and compliance standards

Meet Compliance
