Team in Focus

We have a group of some common and unique individuals making appreciable impact by putting efforts together to give our client best possible outcome despite the challenges they have had to face.

Our team managing the Sanctum Project comprising of 15 members co-ordinates and shares a great work bonding. They work together as a team in every situation and identify the solution to every challenge coming their way; presenting a clear example of how teamwork at Skillmine should be.

We plan our activities well in advance; constructs deliverables, and then present them to project stakeholders. We implement the plan with defined time frame focusing on quality. We continuously track project's progress and ensure that the milestones and deliverables stick to the project schedule.

Success Mantra

The team is clear about its mission and goals. We constantly examine and try to continuously improve ourselves. The team focuses on and understands "Why" and "How" before starting any task.

"My team members make high-quality decisions together and have the support and commitment of the group to carry out the decisions made."
- Says Brahma Aswal, Sr. Manager (IT)

Team Wins

Successfully configured a desktop central secure gateway for roaming user systems to patch and maintain compliance.

Good Reading

The Proof of Worth

Though victory's proof of the skill you possess;
Defeat is the proof of your grit:
A weakling can smile in his days of success,
But at trouble's first sign he will quit.
So the test of the heart and the test of your pluck
Isn't skies that are sunny and fair,
But how do you stand to the blow that is struck
And how do you battle despair?
A fool can seem wise when the pathway is clear
And it's easy to see the way out,
But the test of man's judgment is something to fear
And what does he do when in doubt?
And the proof of his faith is the courage he shows
When sorrows lie deep in his breast,
It's the way that he suffers the griefs that he knows
That brings out his worst or his best.
The test of a man is how much he will bear
For a cause which he knows to be right,

How long will he stand in the depths of despair,
How much will he suffer and fight?
There are many to serve when the victory's near
And few are the hurts to be borne,
But it calls for a leader of courage to cheer
The men in a battle forlorn.
It's the way you hold out against odds that are great,
That proves what your courage is worth,
It's the way that you stand to the bruises of fate
That shows up your stature and girth,
And victory's nothing but proof of your skill,
Veneered with a glory that's thin,
Unless it is proof of unfaltering will,
And unless you have suffered to win.

Women's day Celebration

Congratulations on the "GOOD NEWS"!

- Congratulations to Grishma Thakkar on the birth of her sweet baby boy.

- Congratulations to Jai Prakash Singh on the birth of his sweet baby boy.

Speaking Corner

Avinash S

Enterprise Infrastructure Analyst

Avinash S shares how working at Skillmine satisfies his tech-savvy mind. He expects to hone his skills in different software in the coming days.

It's been almost a year since I joined Skillmine. My current role as a Network Engineer bestows in me responsibilities like establishing and maintaining good network performance, updating the data server and network equipment, administering, configuring, designing, and troubleshooting the network protocols, and more. From ideation to implementation of a project, there are many ways to be creative in Tech. Skillmine has always helped me learn, grow and expand my creativity. I got an opportunity to enhance my technical skills in Office 365, desktop troubleshooting, Sophos endpoint security, and Sophos firewall. I hope to work more in the software defined wide area network infrastructure and virtualization environment very soon.

Prashanth B Balla

Network Engineer

Prashanth B Balla shares his experience of working with a passionate group of professionals. He works with the NPM tool to monitor network performance of different applications, creates real-time dashboards for different applications, monitors the health status of network devices, cloud devices, and more.

I joined Skillmine as a trainee more than a year back. What I like about working here is that no two days are alike. I come across many real time network issues of applications on a daily basis. Such challenges motivate me to come up with new solutions. I have enhanced my technical knowledge and skill in CCNA, bashscripting, Python, cloudcomputing, AWS, MCSA, and NPM Riverbed tool after joining Skillmine. I hope to participate more in troubleshooting network issues in the coming days.

Abhijith Nair
Network Engineer

Abhijith Nair talks about his enriching experience at Skillmine. He works closely with Citrix load balancers in a banking environment.

It's been only three months since I joined Skillmine. But what an experience it has been! Being a quick learner, I have enhanced my skills with regards to networking, virtualization, cybersecurity, and LinuxOS platform so far. My responsibilities include implementation of new VIP and server clusters in load balancers, SSL offloading, GSLB configuration, content switching, solutions through Citrix app expert feature, and more. Providing prompt load balancing and device oriented troubleshooting are the other aspects of my job. I hope to enhance my skills with regards to Citrix Certified Associate Networking concepts in the coming days.
