

# EVOLVING with a Purpose.

## Aufait is Now **Newsmine**

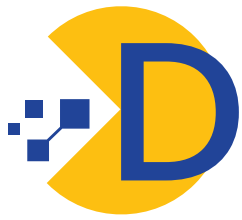

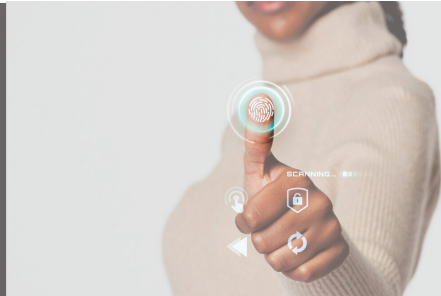

As we continue to evolve, we're excited to announce the transition from Aufait to Newsmine—a refreshed identity that reflects our mission to deliver sharper insights, impactful stories, and actionable updates for decision-makers.

This transformation goes beyond a name change; it redefines how we engage with you, delivering value that empowers CXOs with clarity, innovation, and success in today's rapidly changing business landscape.

Join us on this exciting journey as we bring you a plethora of updates and engaging stories each month from Skillmine.

# New Wins

Skillmine has assisted a leading NBFC enhance its identity and access management with Skillmine Auth. By integrating SSO-supported applications, we streamlined user onboarding and deboarding, reducing IT dependencies. Our centralized admin portal enables seamless access control, enforces compliance, strengthens security, and optimizes IT operations with advanced monitoring, role-based access, MFA, and password policy management.

A renowned financial services firm has enhanced its operations with DataV. Skillmine streamlined data aggregation by correlating client and demat account information. Automated reporting replaced manual processes, improving efficiency. Additionally, forecasting capabilities now enable accurate predictions of client registrations and onboarding trends, empowering them with data-driven decision-making.

A leading payment solutions provider has strengthened its compliance framework with COMPLYment. Skillmine enabled them to manage policies, audits, and regulatory updates seamlessly. Automated risk management replaced manual tracking, ensuring effective identification, mitigation, and monitoring. Additionally, vulnerability management now follows a Maker-Checker approach with reconciliation mechanisms for enhanced security.

## What's New?

We are continuously innovating and driving progress across both new and ongoing projects. Here's a glimpse into the latest developments and key milestones achieved.

### Enhancing Operations for a Leading Diagnostics & Healthcare Provider with eComPaaS

#### Corporate Membership Integration

Implemented a feature in the admin panel, allowing organizations to upload group details directly instead of adding members manually. This has improved operational efficiency.

#### Business Growth Impact

The client can now cater to corporate clients, expanding their market reach and increasing revenue potential.

## Optimizing Digital Transactions for a Renowned Healthcare & MedTech Company with eComPaaS

### Payment Gateway Integration

Enabled transactions via Netbanking, Credit Card, and UPI. Netbanking is live, while the other two are set to go live within two weeks.

### Advanced Delivery & Logistics Integration

Previously limited to cash-on-delivery, the system now integrates multiple logistics vendors streamlining deliveries and improving order fulfillment.

### Business Growth Impact

The ability to track and manage deliveries across B2B, B2D, and B2C segments has strengthened the client's eCommerce capabilities, leading to better customer satisfaction and business scalability.

## Strengthening Compliance for a Leading Financial Institution with COMPLYment

### Review Mechanism Revamp

Implemented a configurable Maker-Checker system to improve compliance monitoring.

### TAT Metrics for Risk Assessments

Introduced a time-based tracking system for risk identification and resolution.

### Audit & Compliance Efficiency

Enhanced task reassignment mechanisms, ensuring streamlined workflows and faster closure of audit gaps.

## Simplifying Access Management for a Well-Known Microfinance Company with Skillmine Auth

### Multi-Application SSO & MFA Integration

Integrated both internal and external applications, simplifying user access and reducing IT dependencies.

### Multi-Domain Management

Upgraded the system to support multiple domains under a single Auth tenant, centralizing backend directories and optimizing IT management.

### Operational Impact

IT teams can now efficiently manage multiple user domains through a single database, reducing manual efforts and ensuring secure authentication protocols.

## Introducing Skillmine's Product Partner

## Simple tree has joined hands with Skillmine

as the Official Reseller Partners of Skillmine's home-grown solutions, enhancing the reach and accessibility of these cutting-edge solutions.

## Podcast Series

We're beyond excited to launch our brand-new podcast series, Tech Baithak!

In our inaugural episode, host Ashwin Agrawal sits down with Nishikant Katre to explore how Identity and Access Management (IAM) is revolutionizing Secure Access Service Edge (SASE) frameworks.

Discover key insights into the powerful intersection of IAM and SASE, and how it's transforming security landscapes in today's digital era. Watch the full episode on our YouTube channel for an in-depth exploration of IAM's role in shaping robust and scalable cybersecurity strategies.

# Event Coverage

The 4th Edition of the Cyber Security Excellence Awards 2025 concluded on 24th January 2025 at Bangalore which celebrated exceptional contributions and innovations in the field of cybersecurity. This prestigious event brought together leading experts, organizations, and trailblazers to recognize and honor advancements in safeguarding digital assets.

Skillmine proudly participated as a Gold Partner at this Summit, hosting an engaging exhibition space that showcased our innovative IT solutions, advanced products, and expertise in driving business transformation through technology. The booth featured our flagship offerings, including Skillmine Authenticator, DataV, Complyment, and Ecompass, underscoring our commitment to enabling digital transformation and building secure, scalable, and efficient IT ecosystems. Additionally, we demonstrated exemplary leadership in addressing the ever-evolving challenges of the cybersecurity landscape through a presentation for the audience, solidifying our position as a trusted partner in technology and security innovation.

## Why Worry About "Security Posture Checks"?

How Can an Organization Identify and Address In-House Policies and Ease Control Management Systems to Manage "Audit Cycles" and "Company Policies"?

Skillmine presents COMPLYment, a comprehensive compliance management solution offering various security posture checks. These checks help identify configurational drifts, deviations in critical system settings, and software vulnerabilities that must be validated according to regulatory standards defined under various controls by governing bodies.

COMPLYment offers features such as a Kanban mechanism, correlation, maker-checker, and reminder system. These systems ensure that organizations identify and remediate loopholes and align with evidence collection mechanisms. These systems validate and take appropriate actions to protect against unexpected attacks and ensure the required artefacts are marked for audit purposes.

With over 650+ controls and support for 50+ regulatory standards, including IRDAI, SEBI, DPDP Act, SAMA, CERT-IN, PCI DSS, ISO, HIPAA, and more, COMPLYment helps organizations enforce strong system hardening measures on their endpoints, applications, and servers. Its multifunctional framework allows for managing IT GRC Cybersecurity validation, policy management, and even employee awareness systems, addressing organizational needs while reducing threat exposure and streamlining policy-driven systems.

## Why IT Leaders and Security Stakeholders Should Focus on COMPLYment?

**Align goals and objectives:** It helps streamline security objectives with organizational goals.

**Continuous education and skill training:** Keep teams updated on best practices.

**Clarify roles:** Ensures each team member has a defined role while complying with organization norms.

**Regular communication and collaboration:** Foster teamwork and transparency.

**Use collaborative technology:** Leverage tools to improve team efficiency.

**Conflict resolution systems:** Implement mechanisms to address issues promptly.

**Foster validation and artefacts checkpoints:** Ensures checkpoints are in place for audits.

**Wide-level operating measures:** Apply controls across internal teams, external vendors, and consultants.

**Ease your audit cycles:** Streamlines the audit process to reduce last-minute timelines and compliance adherence.

In conclusion, COMPLYment helps organizations maintain a robust security posture, simplify audit cycles, and ensure compliance with evolving regulatory standards, empowering teams to focus on innovation rather than worrying about compliance gaps. Designed to streamline compliance management, COMPLYment enables organizations to navigate complex regulatory landscapes effortlessly.

Let COMPLYment handle the intricacies of compliance, so your teams can dedicate their energy to driving innovation and achieving sustainable business growth with confidence.

# Customer Testimonials

See how our customers are transforming with us!

We sincerely thank Skillmine for their outstanding support in helping our organisation achieve the PCI DSS V4.0.1 certification.

Skillmine's expertise, commitment and timely execution were crucial to the success of this project. We also recognise the valuable contributions of the POS team, whose efforts ensured a smooth and efficient process.

We are extremely grateful for the exceptional support and professionalism provided by Skillmine during the email migration project from Google Workspace to Microsoft 365. The entire process was seamless, with minimal disruption to our operations, thanks to their expertise and attention to detail.

Their collaborative approach and clear communication kept everyone aligned and ensured the project's success. It has been a pleasure working with such a dedicated and skilled team. We look forward to partnering on future projects.
