

# NEWSMINE

## The pace of digital transformation is accelerating.

Security threats are evolving, compliance demands are increasing and businesses need smarter solutions to stay ahead.

This edition of NewsMine explores the latest innovations in securing access, automating compliance, and enhancing digital experiences.

Discover how **businesses are boosting security and governance** with Skillmine Auth, COMPLYment & Ecompass. Explore success stories, expert insights from **Tech Baithak podcast**, and key takeaways from **Industry Events**.

## Product Use Cases

Zero-trust identity management, centralized access governance and real-time auditability.

AI-driven compliance automation, regulatory mapping and seamless risk mitigation.

## Tech Baithak | Podcast Series

Executive Director Ashwin Agrawal & cybersecurity strategist Ravi Kumar discuss SOC strategies, SEBI frameworks and future cyber trends.

## Industry Spotlight NBFCs

*Presenting two high-impact use cases demonstrating how Skillmine Auth and COMPLYment are redefining security and compliance frameworks for NBFCs.*

NBFCs face growing cyber threats and regulatory scrutiny, making security, compliance, and efficiency crucial. Strong access control and governance are essential in this evolving digital landscape.

### Skillmine Auth – Securing Access in a Fragmented User Ecosystem

NBFCs face a unique challenge managing access for both internal employees and external stakeholders (vendors, agents, partners) while mitigating security risks and maintaining compliance. Manual provisioning and decentralized access controls expose financial institutions to unauthorized breaches and operational inefficiencies.

#### Key Challenges

Fragmented identity management across disparate applications.

Lack of granular access control for external users.

Difficulty in enforcing compliance with real-time auditability.

#### The Skillmine Auth Advantage:

##### Unified User Management:

Centralized identity governance with defined roles for internal and external users.

##### Granular Access Controls:

Adaptive authentication with conditional access based on user type, location, and risk score.

##### Audit & Compliance

**Enforcement:** Real-time logging of user actions with forensic-grade traceability.

**Outcome:** NBFCs leveraging Skillmine Auth achieve zero-trust identity management, enhanced governance, and seamless compliance adherence.

## COMPLYment – Automating Compliance & Risk for NBFCs

Regulatory compliance in the NBFC sector is an ever-evolving challenge, with mandates from RBI, SEBI, CSCRF, and other financial regulators demanding real-time governance, risk management, and compliance (GRC) execution. Legacy compliance frameworks relying on manual audits and siloed reporting structures create significant inefficiencies and regulatory exposure.

### Key Challenges

Managing multi-framework regulatory compliance without operational silos.

Ensuring seamless audit trails across departments.

Addressing security gaps and vulnerability tracking with real-time remediation.

### The COMPLYment Edge:

#### Automated Audit & Compliance Management:

Kanban-based evidence collection, role-based assignments, and auto-validation.

#### Regulatory Framework Mapping:

Direct integration with RBI, SEBI, and financial compliance standards.

#### Real-Time GRC Analytics:

AI-driven insights for risk mitigation and compliance enforcement.

#### Security & Vulnerability Tracking:

Continuous monitoring with automated remediation workflows.

**Outcome:** NBFCs using COMPLYment eliminate compliance inefficiencies, reduce regulatory penalties, and establish a proactive security posture.

COMPLYment

## Client Implementations

### Driving Digital Transformation

#### NBFC Secures Access with Seamless Integration

A leading Non-Banking Financial Company (NBFC) has enhanced its **identity and access management** by integrating a **Learning Management System (LMS)** with **Skillmine Auth**. This enables seamless, **single-sign-on (SSO)** authentication across multiple applications while ensuring security and compliance. The next step involves building a **FinOne Connector**, allowing **BFSI** enterprises to simplify integrations and user management.

#### Payments Firm Automates Compliance Governance

A rapidly growing **digital payments provider** has streamlined its **compliance and governance framework** with **COMPLYment**. By implementing a **Maker-Checker workflow**, the organization has ensured structured policy approvals, eliminating manual errors and improving audit readiness. This transformation enables **real-time compliance** tracking, aligning operations with evolving financial regulations.

### Microfinance Institution Enhances Audit Visibility

A **major microfinance company** has strengthened its security and audit framework through **Skillmine Auth**, with newly introduced comprehensive reporting capabilities within its user management console. Customers can now **download** detailed **audit logs, including inactive users, login/logout activities, MFA triggers, and password change history**. These enhancements provide real-time security monitoring while ensuring regulatory adherence.

### Healthcare Firm Optimizes Digital Commerce Strategy

Skillmine has enhanced the digital commerce experience for a **leading healthcare and diagnostics provider** by introducing membership-based pricing transparency within **Skillmine Ecompass**. This addition allows customers to **compare standard and membership pricing at checkout**, enabling more informed purchasing decisions. It also empowers vendors to strategically promote membership programs, driving higher adoption rates and improving customer retention.

## Podcast Series

### Tech Baithak – Episode 2

In this episode of Tech Baithak, **Ashwin Agrawal** (Executive Director, Skillmine) speaks with **Ravi Kumar** (Seasoned Cybersecurity Strategist) about SOC strategies, SEBI frameworks and future cybersecurity trends. Don't miss these expert insights!

A promotional graphic for the podcast "Tech Baithak". The background is dark blue with a grid pattern and a waveform. On the left, there is a logo for "TECH baithak PODCAST" with a yellow and orange color scheme. Below the logo, it says "Episode 2" in a red pill-shaped button. At the bottom left, the title "ADAPTING SOC STRATEGIES TO THE EVOLVING THREAT LANDSCAPE" is written in yellow and white. In the center, there is a circular photo of two men, Ravi Kumar and Ashwin Agrawal, shaking hands. Below the photo, their names and titles are listed: "Ravi Kumar Seasoned Cybersecurity Strategist" and "Ashwin Agrawal Executive Director Skillmine". At the bottom right, there is a red button with a play icon and the text "WATCH NOW".

## Event Coverage

### 7.0 Technology Excellence Awards Hyderabad

At the 7.0 Technology Excellence Awards 2025, Skillmine proudly took the spotlight as a Gold Partner, fostering thought leadership and impactful industry discussions. We were also joined by our channel partner, Locuz, as part of our participation.

With **Vishwa Kiran** leading an impactful session, we explored how AI-driven automation, cloud-first strategies, and hyperautomation are reshaping the future of enterprises.

### 4th Edition Manufacturing 5.0 Summit & Awards

Skillmine was honored to be a Silver Partner at the 4th Edition of Manufacturing 5.0 Summit and Awards in Pune, driving conversations on the future of industrial innovation.

**Anant Agrawal**, Managing Director, Skillmine Technology, moderated a thought-provoking fireside chat on defining the tech roadmap for the future of manufacturing while **Shriraj Kamblee**, AVP - Product & Client Services, delivered an insightful presentation on how AI, IoT, and cybersecurity are transforming the industry landscape.
