

NEWSMINE

Welcome to the July edition of Newsmine. As we step into the second half of the year, we are excited to share our recent achievements, which helped in the progression of Skillmine's transformative journey.

June was a month of momentum, on account of new leadership, onboarding new clients, and building strategic partnerships. We harnessed the power of AI to bring smarter learning and enterprise solutions, which laid the groundwork for a future that's faster, intelligent, and resilient. **Dive in!**

Highlights:

Built our very own
AI-native learning
intelligence engine

Forged strategic collaborations
to enhance service delivery
and innovation

Accelerating our AI/ML
vision with Agentic AI
frameworks

Tech **Spotlight**

No More Blind Spots – AI's Edge in Anomaly Detection

AI In Anomaly Detection

Identifying Real-Time Threats

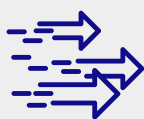

In today's data-driven world, AI/ML anomaly detection has emerged as a vital practice that strengthens root-cause analysis and reduces risks. Traditional monitoring tools cannot keep up with these modern IT environments which are more complex than ever, thanks to hybrid infrastructure, growing data volumes and distributed systems.

AI-driven anomaly detection perpetually learns from your environment data and helps in identifying subtle patterns and early signs of trouble before they intensify and cause outages or customer-affecting incidents.

These AI models not only spot issues but also enable you to act proactively with their:

Real-time
feedback

Accelerated
response

Minimized
interruptions

Advanced root
cause analysis

The days of reactive monitoring are long gone. You can detect and tackle issues before they even surface, with AI on your side. Explore how our AI solutions can improve your IT resilience.

Next month on Tech Spotlight: We unpack 'DevOps Meets AI -How MLOps is Reshaping the Software Lifecycle'.

Striking Gold – Skillmine Leaders

We are excited to welcome seasoned leaders who bring decades of experience and deep expertise to Skillmine's strategic journey

Kamaljeet Rastogi

Vice
Chairman

Kamaljeet Rastogi, our new Vice Chairman, brings over 30 years in the global IT space with a proven track record in digital transformation, product innovation, and market expansion.

Vishwa Kiran

Chief Digital &
Technology Officer

Vishwa Kiran, our Chief Digital & Technology Officer, brings 35 years of experience in product engineering, enterprise architecture, and software development. He has led innovation and digital initiatives at Accenture, Dell, and Widasconcepts.

Fahad Ibrahim

CEO of Skillmine
Saudi Arabia

Fahad Ibrahim, CEO of Skillmine KSA, brings hands-on expertise in automation, solution delivery, and regional growth strategy. Together, they strengthen our leadership backbone and will play a key role in driving innovation, scale, and impact across markets.

New Wins

Onboarded a fast-growing fintech business for **end-to-end application development leveraging React, .NET, and DevOps-as-a-service.**

Partnered with a leading financial services firm to deliver **contractual staffing solutions, enabling rapid team scale-up with niche and specialized skill sets.** This collaboration reflects our commitment to deliver workforce agility and precision in highly specialized domains.

Our advanced **AI-powered DMS redefines document handling, with Auto-RAG, intelligent comparisons, and structured data extraction.** Recently demoed for a complex use case, it is built to solve real-world challenges with minimal manual effort.

New Wins

Supported a key enterprise across digital and infrastructure initiatives through **resource augmentation, architecture consulting, and DevSecOps enablement**. We are implementing secure CI/CD pipelines and guiding best practices to accelerate delivery and strengthen operational resilience.

We're building **an autonomous Customer Service Agent** that goes beyond chatbots—making real-time decisions, learning from internal policies, and working across channels without manual input.

LOQ

A leading manufacturing enterprise has implemented our **LOQ sales management platform** to digitize their end-to-end sales lifecycle. Integrated with their backend systems, this solution has enhanced pipeline visibility, accelerated response times, and enabled data-driven decision-making.

SkillZen

by SDCFI Systems & Solutions

SkillZen is our AI-driven learning engine that automates training content, boosts engagement, and ensures compliance. Now in early use, it's evolving through **real-world insights to become a powerful, scalable upskilling tool for enterprises**.

What's New

COMPLYment

Automated Vulnerability Mapping for Efficient Compliance

COMPLYment now supports automated mapping of vulnerability reports from the security testing platform into its internal reporting templates. This ensures consistent formatting across assets, improves tracking over time, and simplifies remediation workflows.

Business Impact:

- *Standardized Reporting for quicker analysis and action.*
- *Reduced manual effort and streamlined audit readiness.*

Skillmine Auth

SMTP Support for Federated O365 Domains

Skillmine Auth has enabled SMTP integration in federated Office 365 environments using App Passwords. This overcomes previous configuration limits and supports robust email-based workflows.

Business Impact:

- *Enabled alerting and policy-based notifications without subdomain dependencies.*
- *Streamlined monitoring and compliance tracking in federated setups.*

What's New

Integrated Connectors & Custom Data Solutions

Implemented native connectors for service, endpoint, and network management tools, delivering unified IT visibility through a centralized dashboard.

Business Impact:

- Improved operational efficiency and real-time monitoring.
- Enabled data-driven decisions through automated insights.

Delivered a custom deduplication and reporting solution within a high-volume financial environment.

Business Impact:

- Enhanced data quality and reporting accuracy.
- Improved system security and tailored user experience.

In the Public Eye: Driving Digital Governance

We are proud to be **part of the conversation at Bharat PSU Manthan**, where the future of digital governance took center stage. Our team brought strong representation, thought leadership, and strategic insights, highlighting our commitment to secure, forward-looking innovation in the public sector ecosystem.

Our Director – PSB Delivery, Sampath Polisetty led with a compelling keynote on next-gen cybersecurity strategies, while Rajesh Sinha added depth during a panel on “The Future of Governance.” The PSB team’s collective presence, from operational execution to strategic vision, truly reflected Skillmine’s role as a trusted digital partner.

Kudos to everyone who brought the Skillmine spirit to the forefront!

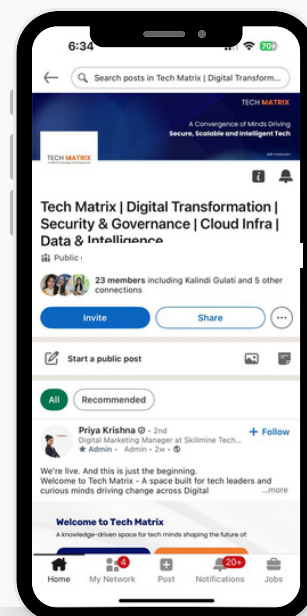

Introducing Tech Matrix

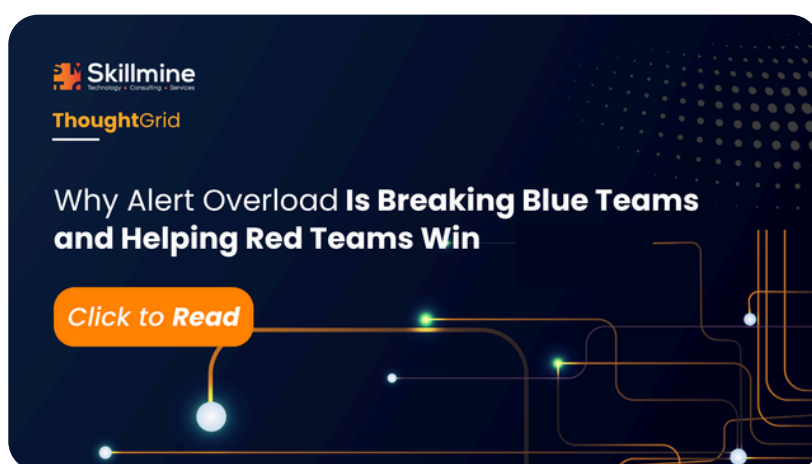

We are proud to have launched Tech Matrix, a Skillmine's professional community on LinkedIn. This is a dedicated space for technology leaders and enthusiasts to share insights, engage in discussions, and stay ahead in this rapidly growing tech world.

Focused on Digital Transformation, Cloud Infrastructure, Data & Intelligence, and Security & Governance, Tech Matrix is built to spark collaboration, showcase expertise, and strengthen our presence in the broader tech ecosystem.

Be a part of the community.

Skillmine ThoughtGrid

Legacy SIEMs and obsolete detection models overwhelm SOC teams with false positives and distracting alerts, while threat actors exploit the gaps.

Read this blog **to learn how alert fatigue helps red teams win**, and why precision, behavior-based detection, and automation are the way forward for resilient cybersecurity.

As we continue to gather force and cut along innovation, breakthroughs, and partnerships, we are excited about what lies ahead. Looking forward to bringing you more stories, ideas, and value with next month's edition.

Stay connected. Stay inspired.
