Your Windows Login Is the New Front Door.

80% of breaches *start with stolen or weak credentials.*

If your login isn't MFA-protected, attackers are already knocking.

One Password = Full Network Access

Local | RDP | VDI | Shared Terminals

Traditional passwords can’t protect modern enterprises.

Introducing
Skillmine Auth – Windows MFA

Skillmine Auth

MFA built directly into Windows logins. Works across Local Desktops, Remote Access, and Virtual Machines.

Secure every entry point, right at the OS level.

Why Windows MFA Stands Out

Native Windows Login Protection

AD/LDAP Directory Integration

5+ MFA Channels (SMS, Email, WhatsApp, Push, TOTP)

Compliance-Ready Audit Logs (RBI, ISO 27001, HIPAA, GDPR)
