NEWSMINE

Insight.
Innovation.
Impact.

This month marked strong momentum across security, governance, and intelligent operations. From securing strategic enterprise mandates and launching AI-powered platforms like OpsIQ and DocIQ, to strengthening cloud resilience, digital forensics capabilities, and authentication frameworks, our focus remained clear—building secure, scalable, and future-ready enterprises.

Let's explore the milestones driving this momentum forward.

CELEBRATING
15
YEARS
OF EXCELLENCE

Top Highlights

Momentum That Matters

Secured strategic IT and cybersecurity and GRC mandates across leading financial institutions

Expanded enterprise security with MFA, cloud, and forensics enhancements

Launched OpsIQ and DocIQ to power AI-augmented operations and intelligent document management

Celebrated 15 years of Skillmine at Tech Noir with leaders shaping the future of AI, Digital, and Cyber

Tech **Spotlight**

Cloud Native Security Securing Systems Built to Scale, Not Sit Still

Cloud-native applications are built for constant change. Containers are ephemeral, microservices communicate dynamically, and infrastructure evolves through code, not manual intervention. While this enables speed and scale, it also exposes the limits of traditional perimeter-based security models that were never designed for such environments.

Cloud native security is not about adding more tools at the edge. It is about embedding security directly into how applications are designed, deployed, and operated across their entire lifecycle.

Why cloud-native environments demand a new security approach:

Short-lived workloads move faster than manual controls.

East-west traffic between services bypasses perimeter defenses.

CI/CD pipelines drive infrastructure changes, not administrators.

Shared responsibility models introduce ownership and visibility gaps.

Modern cloud native security focuses on secure-by-design architecture, identity-driven access, continuous validation, and automation with context. Security is no longer a final checkpoint. It becomes a continuous capability that evolves alongside applications.

At Skillmine, we help enterprises align cloud native security with real-world application design and operational realities. By embedding security into code, pipelines, and runtime behavior, organizations can scale confidently without slowing innovation.

Read our latest blog on cloud native security and building protection that scales with your systems.

New **Wins**

Strategic Security Operations Engagement
Skillmine has secured a strategic IT and cybersecurity engagement with a leading pension fund in India.

The mandate includes implementation and ongoing management of SIEM and EDR/XDR, disk encryption monitoring, Zscaler DLP, Cisco ISE Zero Trust, and AWS Cloud Security Posture Management, along with development of Information Security policies aligned to regulatory requirements.

Delivered by dedicated in-house experts, the program follows a structured Assess, Monitor, and Remediate approach to strengthen security posture and elevate maturity levels.

Governance and Compliance Strengthening Mandate
Skillmine has secured a Governance, Risk, and Compliance engagement with a leading NBFC in India.

The engagement focuses on strengthening the organization's GRC framework through risk assessments, control reviews, regulatory alignment, and policy enhancements. This initiative will improve risk visibility, reinforce compliance controls, and elevate overall governance maturity.

Strengthening Cyber Investigation Infrastructure
Skillmine has secured an engagement with a leading government technology agency for the supply, installation, and deployment of a Digital Forensics and Data Recovery solution.

The scope includes end-to-end implementation to strengthen investigative capabilities, enable secure evidence handling, and enhance data recovery readiness. This initiative supports improved cyber response and digital investigation infrastructure.

Public Sector Highlight

Strengthening National Cyber Investigation Capabilities

Skillmine has secured an engagement with a leading government technology agency for the supply, installation, and deployment of a Digital Forensics and Data Recovery solution.

The scope includes end-to-end implementation to strengthen investigative capabilities, enable secure evidence handling, and enhance data recovery readiness. This initiative supports improved cyber response and digital investigation infrastructure.

Product **Highlights**

DataV™

What's New in Skillmine DataV

Skillzen Connector Onboarded
DataV has launched a new connector for Skillzen, Skillmine's AI-powered LMS and AI Course Creator, enabling unified analytics on learning content, engagement, and training outcomes within DataV dashboards.

What's New for Our Customers
Manufacturing Enterprise – Mobile & Tablet Dashboard Access
A premium manufacturer of solar solutions, medical-grade power backups, and EV chargers, can now access DataV dashboards on mobile and tablets, removing the need for desktop access and enabling anytime, anywhere visibility.

Business Impact

Faster, data-driven decisions	Improved agility and productivity	Higher dashboard adoption across teams

Skillmine Auth™

What's New in Skillmine Auth

Enhanced Multi-Factor Authentication methods to strengthen security and improve login flexibility:

Offline OTP For Windows MFA
Generate OTP without internet connectivity, ensuring secure login even in low or no network environments.

PIP (Personal Identification Pattern MFA)
Users select their secret pattern on a grid, helping prevent shoulder-surfing and over-the-shoulder attacks while adding an extra layer of verification.

QR-based MFA
Scan via mobile device to authenticate instantly, enabling faster and frictionless access.

What's New for Our Customers

Enhanced Adrenalin Connector
Optimized and more powerful sync engine, enabling user provisioning and updates to complete within minutes instead of hours.

Business Impact

Faster onboarding and offboarding	Near real-time access updates
Reduced manual intervention and admin effort	Improved operational efficiency and user experience

What's **New**

Introducing OpsIQ
AI-Augmented IT Operations Intelligence by Skillmine

OpsIQ is Skillmine's AI-powered IT operations intelligence platform that unifies monitoring, ITSM, CMDB, and observability into a single command center. It helps enterprises move from reactive firefighting to predictive operations by reducing alert noise, accelerating root cause analysis, and improving SLA-driven incident resolution.

With capabilities across Incident, Problem, Change, Event, and Configuration Management, OpsIQ delivers real-time visibility, intelligent alert correlation, and predictive insights to enhance reliability and operational resilience.

Introducing DocIQ
Intelligent Document Management Reimagined

DocIQ is Skillmine's AI-driven Document Management System that transforms enterprise documents into searchable, actionable knowledge. It centralizes structured and unstructured data in a secure, governed repository with intelligent search and automated workflows.
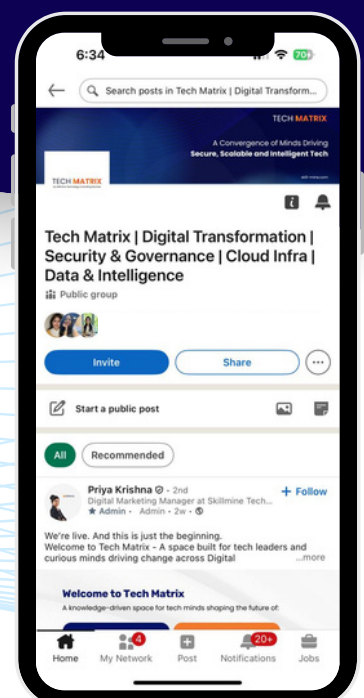

Powered by OCR, semantic search, and AutoRAG-based question answering, DocIQ enables faster document processing, stronger compliance, and seamless knowledge access across the enterprise.

TECHNOIR
INTELLIGENCE. TRUST. MOMENTUM.

Tech Noir was an evening of leadership, ideas, and meaningful dialogue, marking Skillmine's 15-year Crystal Jubilee. The event opened with remarks by Mr. Kamaljeet Rastogi, followed by a celebratory milestone moment with Mr. Anant Agarwal and long-standing clients.

Mr. Vishwa Kiran shared perspectives on leveraging AI, Digital, and Cyber for strategic advantage, followed by an engaging panel on leadership dilemmas moderated by Mr. Ashwin, featuring Mr. Brijesh Singh and Mr. Sumnesh Joshi, exploring the balance between innovation, security, and compliance.

The evening concluded with a keynote by Mr. Saurabh Chandra and closing leadership reflections from Mr. Anant Agarwal and Mr. Mohit Sharma, bringing together a night of celebration, insight, and forward momentum.

Catch you in February 2026 with more stories, wins, and breakthroughs.
